

MUSIC

In music, we will be learning new songs with simple rhythms and adding some musical accompaniments to these songs. We will also play copycat games to help our sense of rhythm, repetition and memory.

We will be learning to play the djembes drums on a Thursday afternoon with a specialist music teacher.

PE

This term in gymnastics and dance we will develop our balance and coordination skills and learn to perform a simple routine with good control. In games, we will be developing our hand eye coordination as we practice throwing and catching skills.

Children will need their P.E kit (shorts, t-shirt & plimsolls) on a **Monday** and **Wednesday** and it can be kept in school all term.

ART/DESIGN AND TECHNOLOGY

During Art and Design the children will be sharing ideas about mark making using a variety of media and creating tools and surfaces to work with. They will investigate ways of communicating their ideas to others and talk about their own and others work. Stories will be used as a stimulus and the children will then explore texture and line through their art work.

WHAT CAN YOU DO TO HELP?

- Maths homework is issued in accordance with what has been taught in school that week. It will be sent home on a Wednesday and collected in on the following Monday.
- Topic homework will be issued half termly
- Read with your child regularly and encourage them to read out aloud using expression. Ask questions about the book they have read and make a comment in their reading record book at least five times a week. Please ensure that only one page of the reading record is filled in each week.
- Work with your child to enable them to become more confident at counting to 100 and writing digits and number names to 20.

Curriculum Information

Year 1
Autumn Term 1-2018

Our Wonderful World

LITERACY

In Literacy, this term we will be consolidating our knowledge of letter sounds and using these to read and spell words. We will also be learning to use letter names as well as sounds when spelling out words. We will be learning to write labels, lists and signs and as part of our science work we will be writing labels for different parts of the human body. We will also be reading and writing our own simple sentences in response to the stories in familiar settings that we read and using 'talk partners' to read to each other. Please read lots of stories at home together and talk about the stories that you read. Also playing rhyming word games, singing songs and listening to repetitive poems is a great way to develop listening skills.

HISTORY

We will be learning about toys past and present. The children will be introduced to the idea of history as detective work by beginning to develop some of the skills of the historian, by making comparisons and finding similarities and differences between their toys now and toys in the past. You could talk to your child about how toys have changed since you were a child. **If possible please send any toys or photos of toys that you played with into school to share with the class.**

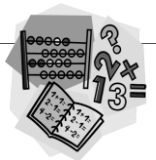

GEOGRAPHY

Although this is not a focus this term we will be thinking about where we live and comparing our locality to the places that we explore in the stories we read. We will also make comparisons with other countries as part of our RE work, focussing on the harvest. You could see if your child can learn their own address, knowing which village/town and country that they live in.

NUMERACY

This half-term, children will be learning to: -

- Count to 100 - reading, writing, comparing and ordering numbers on a number line.
- Use the maths language of more than, less than and equal to
- Calculating - adding & subtracting one digit to 20
- Learning number bonds to 5/10
- Understanding shape – naming and describing 2D shapes
- Measuring - length and height

The children will learn to talk about the maths problems they are working on using the correct mathematical vocabulary and learn to use their maths skills across the curriculum, for example in science activities.

ICT

This term the children will learn about the different uses of information technology in and out of school. We will be learning our own passwords and the importance of keeping safe when using the internet. We will develop our keyboard and mouse skills as we explore the school 360 platform.

SCIENCE

Our topic this term is all about ourselves and making comparisons with other animals. We will be naming body parts and developing our knowledge of the five senses and what we use these for. We will be learning to carry out simple experiments using our senses. We will also be naming, describing and comparing the structure of a variety of common animals including fish, amphibians, reptiles, birds and mammals, including pets.

RE/PSHCE

During our RE work we will be finding out about God and learning about how Christians believe God is loving, kind, fair and Lord and King. We will be using drama and art to explore some of the stories in the bible which show this. Our PSHCE work will focus on rules for the classroom and school and working together with the Calm School Code.
