

Topic challenges

Week beginning 11.1.21

Trapped!

Can you make a cage to safely keep your dinosaur? (or toy.)

You might use lego, blocks, junk modelling etc.
Upload a photo of your dino inside.

Dinosaur rescue!

With all of the snow and ice we have had recently, the dinosaurs have all frozen! Can you work out how to safely rescue them?

Dinosaurs (or other small imaginative toys e.g. lego figures, playmobil etc) will need to be frozen in advance. You can freeze them in balloons (with careful stretching, they can fit in the deflated balloon before filling with water) or in Tupperware containers.

Dinosaur Stomp Dance Along

[\(20\) Koo Koo Kanga Roo - Dinosaur Stomp \(Dance-A-Long\) - YouTube](#)

Can you join in with this dino stomping dance?
Mrs Hutchinson and her children had a try on Thursday- we weren't very good but we did have a lot of giggles!

A fearsome stompy snack

Can you help make a dinosaur themed snack? Use fruit or vegetables to make it a healthy snack.

Pinterest have some great examples, I typed in Dino fruit snack and saw some brilliant footprint skewers and dinosaur shaped watermelon ones.

Creative

- The messy one- can you make some salt dough fossils? Once you have made and rolled your salt dough, you can gently lie your dinosaurs down in it, to create a dinosaur outline. Or maybe you could create some footprints?
- The tidy(ish) one
Can you make your own dinosaur? You can use model materials, paints, dough- whatever you like.
